## **St. Paul's PACE Receives \$1 Million Gift from The Nemeth Foundation**

***\*\*St. Paul's East location becomes The Alexander & Eva Nemeth PACE Center with generous donation\*\****

*SAN DIEGO, CALIF. (July 2, 2018)* - St. Paul's Program of All-inclusive Care for the Elderly (PACE) receives a \$1,000,000 donation for their new location in East County, becoming the Alexander & Eva Nemeth PACE Center.

The PACE Nemeth Center, located at 1306 Broadway in El Cajon, is a senior wellness center and medical clinic for seniors who are over 55 years of age, with chronic medical conditions that make it difficult to live at home. This is St. Paul's newest and third location (others are downtown San Diego and in Chula Vista).

"The Alexander & Eva Nemeth Foundation was established to help those less fortunate in our community. It gives us great pleasure to support St. Paul's PACE in East County, our seniors need these services and St. Paul's has such an incredible reputation for taking care of this delicate population. Thank you St. Paul's for this opportunity to partner with you for the benefit of our community," says, Teresa Castiglione, Executive Director, the Alexander & Eva Nemeth Foundation.

St. Paul's Senior Services is San Diego's leader in senior care since 1960, opening its first PACE program in San Diego in 2008. The Managed Care Health Plan is exclusively for seniors age 55 or over. The program is fully funded by state Medi-Cal and federal Medicare services. St. Paul's PACE supports seniors so they can continue to live independently at home by providing in-home care, transportation, physical and occupational therapy, socialization, and personalized medical services to those that qualify.

The Alexander & Eva Nemeth Foundation strives to impact the quality of life for men, women, children, and animals, by investing in medical research, enhancing health care, improving local communities and assisting in the advancement of the human-animal relationship. Their goal is to help these elements of society, through enhanced research, and community engagement to provide better quality of life for all involved.
